Reader: Robalino Benjamin

Scribes: Proaño Abner and Rojas Matias

Moderator: Lascano Edison

1. GitHub Collaboration

Must Improve Collaboration team commits especially Sandoval, Topon and Tipan in order to keep update to your project.

2. Presentation and Letter

Please, add a letter sort of a contract with your customer, where it says what he needs and what are the agreements. Additional add multimedia evidence about the interview.

3. Requirements

Adjoin the missing requirements you must have at least 10 and must be correctly specified.

Use the IEEE standard template

4. Use Case Diagram

Link the actors missing with the real cases of your project, You must have at least ten use cases.

5. Class Diagram

It does not have packages, add them.

A class in plural, a list named as a class, PrintBill class is a verb

a class that does nothing be careful at naming classes.

Associations wrongly setted, do it correctly.

6. Code consistency vs model

Category is not in the use case

Controller package not found

Incorrect packages names

Product manager with attributes not found in diagram

Undefined attributes in the class transaction

List Class does not have the methods modeled

Invoice attributes changed

Ensure the artifacts make sense together

7. Clean code

Atributte named numfaacture bad name

Use another library than date

Class named in plural clothes

Date and phone number and id registration should not be a String type

Duplicated code

Large class Registration Product

Must improve the menu

8. Running Code

Only clothes manages a json file

Functionalities do not input or output data.

9. Files

Please add the nine json files you are missing.
